May 25, 2016

TO: President, Medical Council of Thailand

SUBJECT: Requesting your consideration in sending medical specialist(s) to evaluate illness

ATTACHMENTS: Three Medical certificates and relevant medical records

I would like to bring your attention to the medical condition of Phrathepyanmahamuni, who suffers from acute on chronic lower extremity DVTs (deep venous thromboses) due to May-Thurner's syndrome. His illness has been verified by a treatment team of doctors who take care of him. Because of his illness, he is unable to travel on May 26, 2016 to the offices of DSI to acknowledge the charges. His medical condition is substantiated by three medical certificates, copies of which are enclosed along with the relevant medical records.

Please note that DSI officials declined our request to send physician(s) of their choice to evaluate and confirm Phrathepyanmahamuni's medical condition, saying that this juncture had already passed. In addition, there was a rumor that the medical certificate issued by Dr. Siripong Pattanavisut was invalid, even though the evaluation had been performed by him.

In view of the fact that the Medical Council of Thailand is a public institution that oversees the ethical and fair practice of the medical profession, we seek your help in sending qualified medical doctor(s) to evaluate the medical condition of Phrathepyanmahamuni at Wat Phra Dhammakaya. This step is necessary and appropriate so that our case can move forward in an ethical manner.

Your consideration is greatly appreciated.

Respectfully yours,

Chuchai Pornpatanapan, Lt., MD.  
Treatment Team
